PERSONAL STATEMENT

Working with the web since 2021, I have developed several apps, packages and themes that reached 15 Thousand consumers. Always concerned with the user experience and using the latest technologies and best practices.

WORK EXPERIENCE

Junior Front-end Developer

At Octaldev Technology and Solutions Ltda · February 2022 - January 2023

Octaldev is a company whose main activity is the development of on-demand software.

- I was working on different apps together with the backend and test teams, developing new features and scaling the app.

- Migrating apps from older **React.js** versions to the newer versions using new practices like adding **TypeScript** to projects and improving performance by reducing **JavaScript** in bundle.

- I developed and used the company's front-end library in projects, which was a package with components and helpers, such as slide, form with **react-hook-form** and cache of fetch responses with **react-query**.

EDUCATION

IT Technician

At IFMA (Federal Institute of Maranhão) · February 2018 - March 2021

- I worked as a monitor in an extension project of the IT course.

Computer Science

At Facimp Wyden · February 2023 - Present

SIDE PROJECTS

- Web ascii theater: **deploy** at https://react-bad-apple.vercel.app and **repository** at https://github.com/datsfilipe/web-ascii-theater.
